

GOLDHOFER

»SMARTCONTROL«

»SMARTCONTROL«

Focus on user-friendliness – that is »SmartControl«, the new low loader semitrailer operating system from Goldhofer. It delivers a wide range of functions at the touch of a button, including tractor engine start/stop, electronic axle alignment and ramp operation where relevant. In comparison with manual actuation,

»SmartControl« has the flexibility and simplicity to deliver a fast, safe and reliable system for your low loader semitrailer. For a solution tailored to your vehicle and operating needs, please do not hesitate to contact the Goldhofer team.

BENEFITS

- ✓ Intuitive symbols on the remote and control panel
- » Simple and safe operation guaranteed for every user
- ✓ Simple adjustment and memory function for various ride heights
- » Significant time savings and high repeat accuracy
- ✓ Redundant system in the form of hydraulics, control panel and remote with integrated diagnosis capability
- » 100 percent availability and fail-safe system design

OPERATION

All »SmartControl« functions for your specific vehicle can be actuated via a remote or on the control panels on the gooseneck and rear bogie.
