

»ADDRONIC« CLEVER COMBINED

①
REMOTE CONTROL

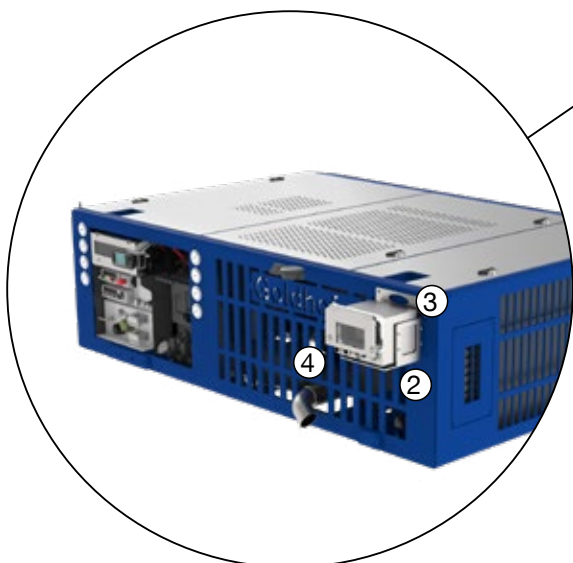

②
**REMOTE RECEIVER AT
THE »ADDRONIC« HOST**

③
**»ADDRONIC«
HOST**

④
CONTROL UNIT

YOUR BENEFITS

»ADDRONIC« makes it possible to cover an even wider range of applications with your Goldhofer module fleet in a user-friendly way.

Simply synchronize the basic functions (steering, leveling and drive) of up to four »ADDRIVE« modules. The »ADDRONIC« makes it easy to integrate your existing PST or THP fleet into the transport combination.

The remote diagnostics function enables quick online support. This means that problems can be solved quickly and safely on site with the support of the Goldhofer service.
